HR Management System

Auth Service

Port: 8081
Description:
Handles secure login and authentication for HR, Admin, and Employee roles using JWT tokens. Manages role-based access control across the platform.

Features:

- Login for multiple roles (HR/Admin/Employee)
- JWT token generation & validation
- Password encryption
- Role/authority mapping

TechStack: Spring Boot, JPA + MySQL, Spring Security, JWT Token

Table	Columns	Constraints
Users	id (PK), username , password, role	**Primary Key**, Auto-increment **Unique**, Not Null Encrypted using **BCrypt** Must be one of: HR, ADMIN, EMPLOYEE

Attendance Service

Port: 8084

Description

Tracks daily clock in/out timings for all employees. It can generate attendance reports and validate presence during payroll calculation.

Features:

- Daily check-in/check-out
- Track working hours
- Attendance history and reports
- Integration with payroll service

TechStack : Spring Boot, JPA + MySQL, Spring Security + JW, Feign Client, Swagger, Java LocalDate / LocalTime

Table	Columns	Constraints
attendance_records	id (PK), employee_id (FK → employee_db.employees.id), date, clock_in, clock_out, status, created_at, updated_at	One entry per employee per day (unique employee_id + date)

Depends on: employee-service, auth-service
